INTEGRATING EATON INTO OUR VIRTUAL NETWORK GIVES ME PEACE OF MIND.

Power management for Citrix environments

Eaton is dedicated to making your work life easier by providing the tools you need to manage your power infrastructure all from your **Citrix XenCenter** dashboard.

How Eaton fits into the virtual landscape

Eaton Intelligent Power Manager (IPM) software is certified as Citrix Ready and simplifies power management by providing the needed tools to monitor and manage power devices in virtual environments. Seamlessly integrating into Citrix XenCenter, IPM ensures system uptime and data integrity by allowing you to remotely monitor, manage and control devices on your network from a single dashboard.

IPM adds value to your virtualized environment by allowing you to:

- **Increase productivity** with easy set up and integration into XenCenter
- **Prevent downtime** by taking action on real-time notifications of power and environmental events
- **Simplify data center operation** through validated integration with Citrix all within a single pane of glass

Why being Citrix Ready is important

Citrix Ready products and solutions interoperate seamlessly with a virtual infrastructure and have met specific Citrix integration and interoperability standards. Since IPM is Citrix Ready that means it integrates quickly and you know it will work.

Manage power from your XenCenter dashboard

IPM is an agentless plug-in to XenCenter, letting you manage power to your virtualized environment through the XenCenter web client and dashboard. This easy-to-set-up solution provides a complete view of your power devices all from the XenCenter dashboard you're already using.

Global IPM features

Feature	Value	IPM Basic	IPM Silver	IPM Gold
Control rack PDUs	Increase control by triggering on, off and reboot commands for Eaton ePDU G3 outlets in response to power and environmental events	✔	✔	✔
Manage third-party power hardware	Increase flexibility with option to use existing power infrastructure, saving time and money during deployment	✖	✖	✔
Send mass configuration and firmware upgrades	Simplify deployments by remotely mass configuring settings and firmware on Eaton UPSs and rack PDUs	✔	✔	✔
Create custom events	Improve responsiveness with customizable events which enables any data to become actionable	✖	✔	✔

IPM enables the following through Citrix

Feature	Value	IPM Basic	IPM Silver	IPM Gold
XenCenter integration	Link IPM directly to XenCenter for power management from a single interface	✔	✔	✔
Virtualized Host Shutdown	Gracefully shut down virtualized host - agent not required on host	✔	✔	✔
Targeted Virtual Machine Management	Shutdown, suspend, power on/off and migrate individual or groups of VMs	✖	✔	✔
Initiate host maintenance mode	Migrate IT workloads to stable XenServers using XenMotion	✔	✔	✔
