Power Solutions for Every Application

UPS Systems | PDUs | Surge Protectors | Power Strips | Charging Carts | USB Chargers

From desktop to data center, we have the power solutions you need to keep equipment ready and available.

UPS Systems

Supply battery backup power during short outages to keep critical equipment running.

- Standby models provide power protection in desktop applications.
- Line-interactive (AVR) models correct brownouts and overvoltages without using battery.
- On-line models feature double-conversion technology with zero transfer time to battery.

PDUs

Distribute power to multiple devices from a UPS, generator or utility source.

- Rugged, all-metal housings have up to 48 outlets.
- Choose from basic, local metered, monitored, switched and ATS models.
- Select PDUs include a network interface for remote monitoring and control of connected equipment.
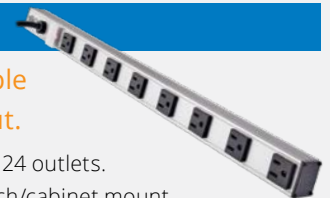

Surge Protectors

Protect electronics against surges, spikes and line noise.

- Choose from models with up to 24 outlets and 4000+ joules of protection.
- Premium Isobar® models feature isolated filter banks for robust line noise protection.
- Options include USB charging ports, tel/Ethernet/coax protection and Safe-IT™ antimicrobial protection.

Power Strips

Distribute power to multiple devices using a single input.

- Models are available with up to 24 outlets.
- Form factors include strip, bench/cabinet mount and rack mount.
- Selection includes models suitable for healthcare facilities and industrial environments.

Charging Carts

Keep laptops and tablets charged, organized and secure.

- Carts have up to 48 AC outlets or USB ports for fast charging/syncing.
- USB models have an uplink port for wired syncing of devices; all models allow wireless syncing.
- Safe-IT models feature UVC sanitizing lights and antimicrobial surfaces.

Safe-IT™ PRODUCTS

USB Chargers

Charge mobile devices with desktop or portable solutions.

- Chargers are available for up to 10 USB devices.
- Form factors include desktop chargers, wall chargers, laptop chargers, car chargers, wireless chargers and power banks.
- Wireless chargers are compatible with Qi-certified smartphones.
