IT starts with a rack

Start with a rack and add everything you need to support your IT installation. Our solutions can help you maximize the performance, security and efficiency of any network environment.

A Racks & Accessories

Secure and organize rack-mounted servers and other IT equipment.

- Floor-standing and wall-mount enclosures and open frame racks
- Cable management accessories

B PDUs

Distribute power in high-density IT environments.

- Vertical (0U) and horizontal (1U and 2U) PDUs
- Models with LX platform interface

C UPS Systems

Protect equipment from power irregularities and provide battery backup.

- Network interface options
- Expandable runtime on select models

D KVM Switches

Control multiple servers or computers with one keyboard/video/mouse console.

- Up to 32 ports with options for IP remote access
- Console models with LCD

E Cables & Connectivity

Connect equipment to servers, computers and other network devices.

- Network, power and audio/video cables
- Copper and fiber network solutions

F Cooling Solutions

Cool equipment in network closets, server rooms or data centers.

- Portable, rack-mount and in-row solutions
- Fans and airflow management accessories
