Benefit from these results! Here's what it includes:

- 1 Site walk through** to identify the current UPS and power management strategy and deployment at site.
- 2 Map electrical infrastructure** primary and sub-panel capability for utilization in future power implementation at the user site.
- 3 Load calculation assistance** with use of customer supplied equipment lists. If lists do not exist, we will review the load information from the equipment on site.
- 4 Review new UPS technologies** and how to effectively and efficiently implement at user location based on the information obtained.
- 5 Detailed discussion** on connectivity methods to effectively manage UPS products and additional facility equipment on a single networked platform.
- 6 After reaching agreed upon hardware products** we'll provide detailed hardware submittal information and quotation.

*Onsite power review will be scheduled after a discovery conference call with Eaton to determine if a physical walk through is required.
