

Trying to sell more power? We can help.

Win more
business
with the
right
questions.

Start with open-ended questions like these to help guide your customer to the conclusion that they need your help now.

- **Have you ever sold your customer power?**

If not, they are buying it elsewhere. Find out who is in charge of power.

- **How do you monitor and manage all your UPS and PDU's?**

Eaton's 3rd party capabilities enable single pane of glass monitoring.

- **Does your customer use Cisco, Citrix, Dell, HPE, NetApp, Nutanix, Scale, Synology or VMware products?**

Eaton's Intelligent Power Manager works with these different platforms to enhance their performance and automate power management.

- **Are you selling your customer anything that goes into a rack?** If so, you are changing the power requirements, we should talk.
